-------	------	----	-----

PD-6LCRi Planar In-Wall Speaker (Each)

	\$645	\$260	\$175
--	-------	-------	-------

Twin 6" Kevlar Neo Magnet Woofers and Neo3PDR Planar Ribbon Tweeter. Tweeter rotates for vertical or horizontal use. 50Hz – 25kHz, 90dB, 4Ohms, 150WRMS. 19.75" x 8.56" x 3.75". 5.4 lbs. The most versatile and powerfully dynamic model in the line, the PD-6LCRi is a true left, center & right channel in-wall speaker that can be mounted either as a horizontal center channel or vertical left, center or right channel. BG Radia's award-winning planar Ribbon Tweeters deliver wide dispersion, balanced coverage, and an extra wide "sweet spot". Superb performance with superb imaging and accuracy. Powerful, audiophile-quality Kevlar woofers. Rugged, reinforced frame and rust-resistant metal grills.

R-18i Planar On-Wall Speaker + Dispersion Pattern Control (Each)

	\$650	\$550	\$500
--	-------	-------	-------

Twin 4" Woofers and dispersion adjustable Neo8PDR Planar Ribbon Tweeter. Tweeter adjusts via built-in DPC control knob. 50Hz – 25kHz, 88dB, 6Ohms, 100WRMS. 26.4" x 8.4" x 4.6". 12 lbs. The R-18i can be used for a wide variety of audio and video applications around the home from multi-room and multi-channel audio to video and home theater. In fact, the R-18i is particularly well-suited for surround sound in high-quality home theater systems. The patent-pending design can easily and quickly provide a choice of a direct or diffuse sound field from a single wideband planar driver via the concealed Dispersion Pattern Control (DPC) knob, located conveniently on the top panel. BG Radia's award-winning planar Ribbon Tweeters deliver wide dispersion, balanced coverage, and an extra wide "sweet spot". The R-18i is a recipient of both the CES Innovations Design and Engineering award and Product of the Year from Electronic House magazine. These prestigious awards recognize the best designed and engineered products in the world.
